INTRODUCING

Your business. *On autopilot.*

Meet **AIOS** — the AI Operating System that runs your business so you can grow it.

CONTEXT-AWARE · ALWAYS ON · FULLY INTEGRATED

AIOS
AI OPERATING SYSTEM

You're not running the business. *It's running you.*

Every founder we meet is stuck in the same trap.

80% of your day is admin

Emails, follow-ups, dashboards. Firefighting, not growing.

You are the bottleneck

Every decision waits for you. Nothing moves without you.

Data everywhere, insight nowhere

Gmail, Xero, Slack, CRM — disconnected. No single view.

More hires ≠ more scale

Hiring adds cost and management, not leverage.

The founders who win the next decade will have the thickest AI layer around their business.

02 · WHAT IT IS

An *intelligence layer* around your entire business.

Not a chatbot. Not another tool. An AI that already knows your business, watches your data, and helps you decide — every day.

01 · IT KNOWS

Your business, loaded in.

Strategy, priorities, team, customers, tone. Not a blank AI.

02 · IT SEES

Your data, live.

Gmail, Xero, Slack, Calendar, CRM. No manual updates.

03 · IT TALKS

To you and your team.

Ask anything. Everyone gets the same business-aware answer.

THE DIFFERENCE

You stop pasting context into ChatGPT. It *already has it.*

Five layers. *Built one at a time.*

Each layer is independently valuable. You feel the return before the next one goes on.

01

CONTEXT

Your operating context.

Strategy, team, priorities, customers.

02

DATA

Everything connected.

Financials, email, calendar, CRM — connected.

03

INTELLIGENCE

Decisions surfaced.

What matters today. Risks. Actions.

04

AUTOMATE

Recurring work retired.

Audit every recurring task. Retire the ones AI can run.

05

BUILD

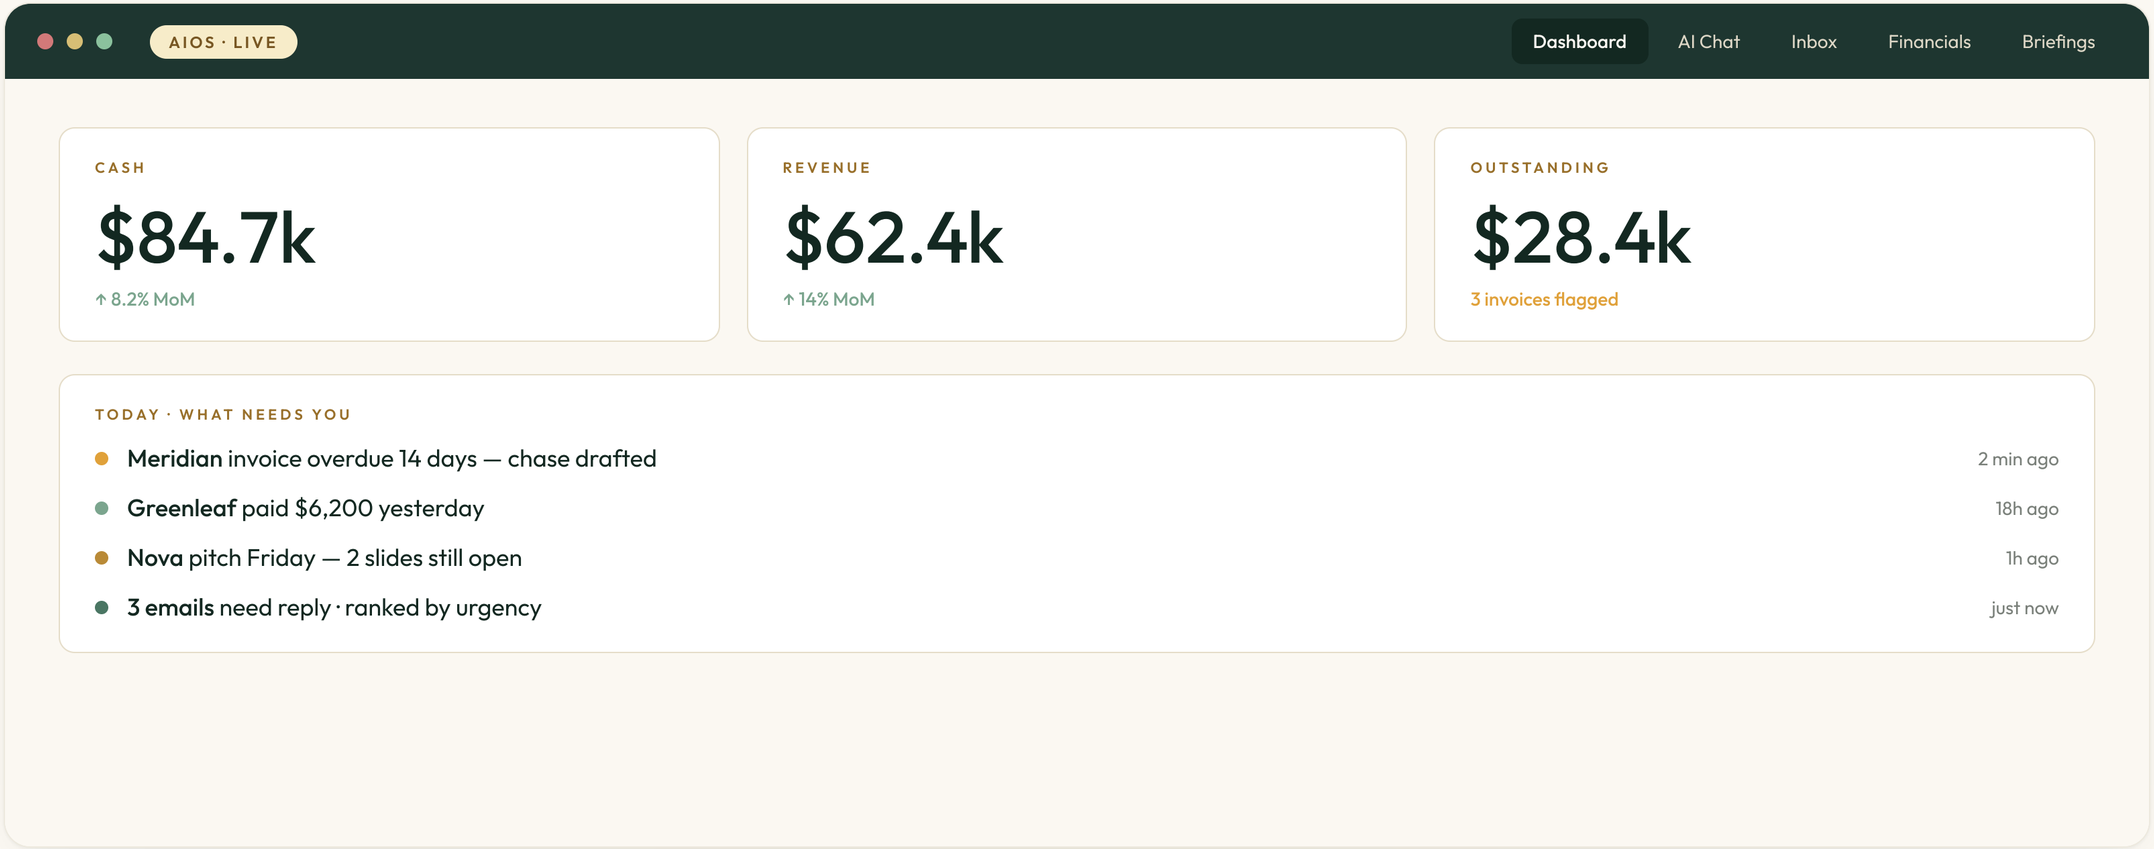
Growth work only.

Freed bandwidth → growth work only you can do.

Layers, not leaps.

The whole business. *One screen.*

Chat, inbox, financials, briefings, automations — one calm surface.



It works *before you ask.*

A working day with AIOS on.

7:00 AM MORNING BRIEF

Inbox, calendar and overnight signals — what needs you first, in one page.

All day EVENT ALERTS

Urgent calls, payments, applications — pings that always mean something.

5:00 PM END-OF-DAY WRAP

What's still open, what never got a reply, tomorrow flagged tonight.

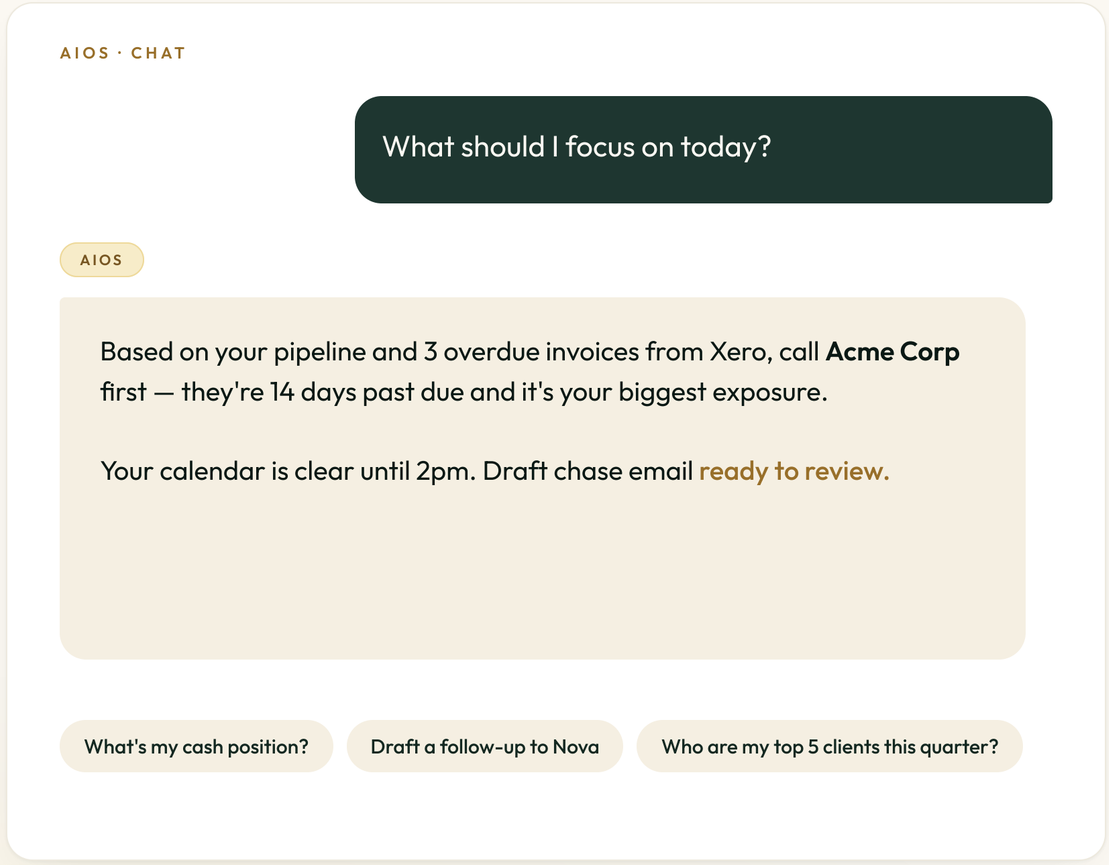
"Knowing what happened in your business over the last 24 hours — without opening five apps."

Ask anything. *Get answers specific to your business.*

Live data
Pulls from Xero, inbox, calendar in real time.

Action-ready
Drafts replies, chase emails, agendas — one click to send.

Team-wide
Same business context for everyone, from founder to junior.



Connected to the tools *you already use.*

One-click connections. Data flows in automatically. No IT project required.

Gmail

Email summaries & actions

Google Calendar

Meeting context & schedule

Xero

Financials & cash flow

Slack

Team signals

HubSpot

CRM & pipeline

Google Drive

Docs as living context

Plus API-first — anything with an endpoint can plug in.

Three numbers. *Simple. Measurable.*

We track these together, monthly. If they don't move, we haven't done our job.

01 · AWAY-FROM-DESK AUTONOMY

You can step away and nothing falls apart.

Before: 0 hrs | After: 6+ hrs

02 · TASK AUTOMATION %

Recurring tasks that run without you.

Before: 0% | After: 60%+

03 · REVENUE PER EMPLOYEE

The new flex for lean teams.

Before: baseline | After: ↑ 40%+

FOUNDER NOTE

"In one week, with bandwidth I'd freed with AIOS, I closed $1M in new revenue I wouldn't otherwise have had time to chase."

— AIOS founder principle. Illustrative of what freed bandwidth makes possible. Not a client guarantee.

This is what happens when the founder finally has time to work *on* the business.

If you're stuck working *IN* the business, you're the one.

THE OVERWHELMED FOUNDER

Running everything alone.

Needs a thinking partner that already knows the business.

THE GROWING SME (5–50)

Systems are duct tape.

Wants to scale without hiring proportionally.

THE OPERATIONS LEADER

COO, GM, Ops.

Needs visibility without micromanagement.

THE SERVICE BUSINESS

Agency, consultancy, trades.

Client-heavy workflows AI can genuinely understand.

Done-for-you. *Live in 12–14 days.*

01

DAYS 1–2

Discovery.

Working sessions to learn your business, team, tools, goals.

02

DAYS 3–6

Context.

We load AIOS with your strategy, priorities, metrics, tone.

03

DAYS 7–10

Connect.

Integrations wired: Gmail, Xero, Slack, Calendar, CRM.

04

DAYS 11–14

Live.

Team onboarded. Chat ready. Dashboards populated.

ONGOING

Compounding returns.

Monthly review. New automations. Expanded modules.

No technical skills required

Works with the tools you already use

You own everything

NEXT STEP

Ready to run your business *differently?*

Book a working session. We'll map your bandwidth trap, agree on the three KPIs, and outline your first two layers.
